 Ainsworth, B. E., Jacobs, D. R., Jr. Response, 25:1192
 Ainsworth, B. E., Jacobs, D. R., Jr., and Leon, A. S. Validity and reliability of self-reported physical activity status: the Lipid Research Clinics questionnaire, 25:92
 Aisenbury, J. A. see Krauss, J. C.
 Alessio, H. M. Exercise-induced oxidative stress, 25:218
 Al-Husseini, K. see Haq, A.
 Aliman, F. L., Jr. Book Review, 25:1194
 Alisen, P. E. see George, J. D.
 Almekinders, L. C. Book Review, 25:977
 Almekinders, L. C., Banes, A. J., and Ballenger, C. A. Effects of repetitive motion on human fibroblasts, 25:603
 Almekinders, L. C. Letter to the editor-in-chief, 25:761
 Alonso, J. see Bernús, G.
 Al-Sedairy, S. see Haq, A.
 Anderson, M. A. see Krauss, J. C.
 Anderson, R. see Laporte, R. E.
 Anderson, R. L. see Aaron, D. J.
 Antonio, J., and Gonyea, W. J. Skeletal muscle fiber hyperplasia, 25:1333
 April, M. E. Book Review, 25:1087
 Araújo, C. G. S. see Nóbrega, A. C. L.
 Armstrong, L. E. see Maresh, C. M.
 Armstrong, L. E., Curtis, W. C., Hubbard, R. W., Francesconi, R. P., Moore, R., and Askew, E. W. Symptomatic hyponatremia during prolonged exercise in heat, 25:543
 Arnaud, S. see Myburgh, K. H.
 Artal, R. see McMurray, R. G.
 Arús, C. see Bernús, G.
 Ashton, H. A. see Kluger, M. J.
 Askew, E. W. see Armstrong, L. E.
 Asmussen, E. Muscle fatigue, 25:412
 Audran, M. A. see Collomp, K. R.
 Ayres, N. A. see Pivarnik, J. M.

B

- Bachmann, A. W. see Hooper, S. L.
 Backrach, L. K. see Myburgh, K. H.
 Balke, B. Guest editorial, 25:169
 Ball, D. W. see Tis, L. L.
 Ballenger, C. A. see Almekinders, L. C.
 Banes, A. J. see Almekinders, L. C.
 Baranowski, T. see Durant, R. H.
 Barbeau, P., Serresse, O., and Boulay, M. R. Using maximal and submaximal aerobic variables to monitor elite cyclists during a season, 25:1062
 Barile, R. J. see DePalma, M. T.
 Barnes, W. S. Effects of Ca^{2+} -channel drugs on K^{+} -induced respiration in skeletal muscle, 25:473
 Barr, S. I. see Webster, B. L.
 Bartoli, W. P., Davis, J. M., Pate, R. R., Ward, D. S., and Watson, P. D. Weekly variability in total body water using 2H_2O dilution in college-age males, 25:1422
 Beard, J. L. see Tobin, B. W.
 Bechtel, P. J. see Czerwinski, S. M.
 Beckers, E. J. see Rehner, N. J.
 Becque, M. D. see Glass, S. C.
 Bedford, W. M. see Clark, R. R.
 Berg, K. E.
 see Latin, R. W.
 see Sachtleben, T. R.
 Bernús, G., Alonso, J., Arús, C., and González de Suso, J. M. Response, 25:1299
 Bernús, G., González de Suso, J. M., Alonso, J., Martín, P. A., Prat, J. A., and Arús, C. ^{31}P -MRS of quadriceps reveals quantitative differences between sprinters and long-distance runners, 25:479
 Berry, M. J. see Brubaker, P. H.
 Berry, M. J., Storsten, J. A., and Woodard, C. M. Effects of body mass on exercise efficiency and $\dot{V}O_2$ during steady-state cycling, 25:1031
 Berryman, J. W. Guest editorial, 25:885
 Berthouze, S. E., Minaire, P. M., Chatard, J.-C., Boutet, C., Castells, J., and Lacour, J.-R. A new tool for evaluating energy expenditure: The "QAPSE" development and validation, 25:1405
 Bertorini, T. E. see Griffin, J. W.
 Bertun, E. Book Review, 25:1194
 Best, T. M. see Reddy, A. S.
 Beunen, G. P. see Blimkie, C. J. R.
 Bigard, A.-X., Lienhard, F., Merino, D., Serrurier, B., Guezennec, C.-Y. Effects of surface electrostimulation on the structure and metabolic properties in monkey skeletal muscle, 25:355
 Bild, D. E. see Sidney, S.
 Billing, J. E. see Farrell, P. A.
 Binder-MacLeod, S. A. see Snyder-Mackler, L.
 Binfield, P. M. see Maffulli, N.
 Binkhorst, R. A. see Hopman, M. T. E.
 Birk, T. J.
 see MacArthur, R. D.
 Poliomyelitis and the post-polio syndrome: exercise capacities and adaptation—current research, future directions, and widespread applicability, 25:466
 Blair, S. N. see Paffenbarger, R. S., Jr.
 Blanc, Y. see Chevrolet, J.-C.
 Blimkie, C. J. R., Lefevre, J., Beunen, G. P., Renson, R., Dequeker, J., and van Damme, P. Fractures, physical activity, and growth velocity in adolescent Belgian boys, 25:801
 Bobbert, M. F. see Jacobs, R.
 Bobbert, M. F., and Herlaar, J. Evaluation of moment-angle curves in isokinetic knee extension, 25:251
 Bockrath, K., Wooden, C., Worrell, T., Ingersoll, C. D., and Farr, J. Effects of patella taping on patella position and perceived pain, 25:989
 Bol, E. see Peters, H. P.
 Bolduc, S. P. Book Review, 25:977
 Bouchard, C. see Dionne, F. T.
 Boulay, M. R.
 see Barbeau, P.
 see Dionne, F. T.
 Boutet, C. see Berthouze, S. E.
 Bove, A. A., see Brubaker, P. H.

KEY WORD LISTING

A

Acid-base balance, sodium bicarbonate ingestion, effect on resistance exercise performance, 25:960

Aerobic capacity, stair-climbing vs run training, treadmill and track running performance, 25:1275

Aerobic demand
cycling, preferred and economical cadences, 25:1269
walking running economy, interrelationships between mechanical power, energy transfers and, 25:508

Aerobic exercise
heart rate and maximum oxygen uptake, obesity, 25:1077
state anxiety and blood pressure, leg ergometry or weight training, 25:1044

Aerobic performance, mitochondrial DNA sequence polymorphism, response to endurance training, 25:766

Aerobic power
short-course triathlon performance, physiological predictors, 25:871
spinal cord injury, isometric strength, 25:863

after running marathon, 25:501

Aging
exercise and, antioxidant enzyme response to, 25:225
exercise and immune function, elderly women, 25:823
health, exercise, and, need for information, 25:538
oxidant stress, exercise and, 25:210
treadmill running, oxygen cost, rats, 25:1259

AIDS, policies and universal precautions, NCAA institution survey, 25:917

Amenorrhea
disordered eating and osteoporosis, female athlete, 25:775
young female athletes, low bone mineral density, axial and appendicular sites, 25:1197

American College of Sports Medicine, 1979 J. B. Wolfe Lecture, muscle fatigue, 25:412

Anabolic steroids
continuous infusion, effect on murine skeletal muscle, 25:485
myocardial structure, cardiovascular fitness, 25:1240

Anaerobic capacity, one- and two-legged cycling, men and women, 25:584

Anaerobic performance, Wingate test, benzodiazepine and caffeine, interaction, 25:1375

Anaerobic threshold
relationship of lactate and ventilatory thresholds, heart transplant patients, 25:191
simplified V-slope method, gas exchange method, 25:1180

Anterior cruciate ligament
isolated ganglions, 25:550
reconstruction, human quadriceps femoris, fatigability, 25:783

Anterior knee pain syndrome, patellar taping, effect on perceived pain, 25:989

Anthropometry
growth patterns, high school wrestlers, 25:1141
Slaughter skinfold equations, cross-validation for children, adolescents, 25:1070

Antihemophilic factor, fibrinolytic and hemostatic parameter, resistance exercise response, 25:597

Antioxidant enzyme, response to exercise and aging, 25:225

Antioxidants, prevention of exercise-induced oxidative stress and, 25:232

Arm exercise, persons with paraplegia, cardiovascular responses, 25:577

Arthroscopy, mediopatellar synovial plica of the knee, athletes, 25:985

Asthma
exercise-induced, 25:554
prone immersion, bronchial responsiveness, children, 25:1098

Athletes
blind, visual loss and performance, 25:265
college football player, inguinal hernia, case study, 25:318
maximal oxygen uptake, simulated competition, 25:877
National Football League, time zone and game time changes, effect on team performance, 25:127
recurrent exercise-induced syncope, tilt table testing and, 25:24
sprinters and long-distance runners, ³¹P-MRS of quadriceps, differences, 25:479
teenage, osteoid osteoma, os calcis, 25:2
world class male, increased life expectancy, 25:237

Attention, patterns prior to golf putt, electroencephalographic measures, 25:116

B

Ballet, dancers, body composition, anthropometric measurements, 25:145

Baroreceptors, exercise training, forearm vascular resistance, humans, 25:722

Baroreceptor sensitivity, aortic-cardiac reflex, hypotension, aerobically fit young men, 25:1024

Beta-blockers, CARDIA study, cigarette smoking and submaximal exercise test, biracial young adults, 25:911

Biceps strength, ulnar bending stiffness, recreational activity, men, 25:592

Bioelectric impedance, skin blood flow, temperature, exercise, 25:1231

Biomechanics, respiratory apparatus, effect on running style and economy, 25:260

Biopsy, muscle biopsy and Cybex testing, fiber type distribution, 25:363

Blood, peripheral lymphocyte subsets, marathon running, 25:186

Blood lipid levels, physical activity, body fat, diet, and, 10-15-yr-olds, 25:748

Blood pressure, state anxiety, leg ergometry or weight training, 25:1044

Blunt trauma, rat skeletal muscle, changes in vinculin and extracellular matrix components, 25:832

Body composition
analysis, female adolescent athletes, six regression equations, comparison, 25:648
effect of bone density on, young adult black and white women, 25:290
estimation in ballet dancers, anthropometric measurements, 25:145
near infrared analysis, children and adolescents, 25:1185
prediction of body fat, dual energy x-ray absorptiometry, skinfolds, and hydrostatic weighing, adult males, 25:528
Slaughter skinfold equations, cross validation for children, adolescents, 25:1070
total body water, weekly variability, college-age males, 25:1422

Body fat
adult males, x-ray absorptiometry, skinfolds, hydrostatic weighing, 25:528
determinations, methods to predict minimal weight, comparison in high school wrestlers, 25:151
near infrared analysis, body composition, children and adolescents, 25:1185

Body fluids, restriction, plasma volume and proteins, cycling, 25:1225

Bone density, effect on body composition, young adult black and white women, 25:290

Bone mineral density
low, axial and appendicular sites, female athletes, amenorrhea, 25:1197
mechanical loading regime, children, 25:1203

Bone scan, false negative, female runner, 25:179

Breathing, oxygen consumption and cardiac output, relationship, 25:335

Bronchodilatory therapy, asthma, exercise-induced, 25:554

C

Caffeine, Wingate test, effects of benzodiazepine, 25:1375

Calcium antagonists, Ca²⁺-channel drugs, effect on K⁺-induced respiration, skeletal muscle, 25:473

Calcium sensitivity, skinned fibers, hypertrophied skeletal muscle, contractile fibers, 25:999

Calcium transport, canine cardiac sarcoplasmic reticulum, endurance exercise training, 25:1246

Caloric intake, energy expenditure evaluation, Saint-Etienne Physical Activity Questionnaire, 25:1405

Capture-recapture strategy, surveillance of serious injuries, recreational sports, 25:204

Carbohydrates
beverages, effects of electrolytes in, gastric emptying and secretion, 25:42
glycogen resynthesis, after resistive exercise, skeletal muscle, 25:349
nutrition status of ultramarathoners and, dietary intakes and biochemical profiles, 25:328

Carbohydrate supplementation, during exercise, liquid vs solid, 25:966

Carbohydrate supplements, gastrointestinal problems, exercise mode, 25:1211

Carbon dioxide, excess, gas exchange threshold, simplified V-slope method, 25:1180

Cardiac hypertrophy, work-induced, Sprague-Dawley rats, IGF gene expression modulation, 25:495

Cardiac output
exercise, maternal aerobic fitness, 25:993
oxygen consumption and, relationship in work of breathing, 25:335

CARDIA study, cigarette smoking, submaximal exercise test duration, biracial young adults, 25:911

Cardiorespiratory measures, perceived exertion, hypobaric hypoxia, low- and moderate-altitude natives, 25:945

Cardiovascular response, persons with paraplegia, prolonged arm exercise, thermal stress, 25:577

CD45RA, indicator of activated T cells, after endurance exercise, 25:1352

Central blood volume, cardiac filling, endurance athletes, Frank-Starling mechanism, 25:727

Cervical spinal stenosis, contraindication to participation in contact sports, commentary, 25:316

Children
leisure physical activity, epidemiology, 25:847
physical activity, body fat, diet, and blood lipid profile, relationship, 25:748

Children's Activity Rating Scale (CARS), evaluation, young children, 25:1415

Chronobiology, leisure time physical activity, 25:755

Cirrus tumor, natural cytotoxicity, effect of exercise, mice, 25:

Claudication, pain after walking, dissipation, endurance training implications, 25:904

Clothing, -specific heat exchange coefficients, simultaneous derivation, 25:283

Compendium of Physical Activities, human physical activity, classification of energy costs, 25:71

Computerized tomography, liver laceration, 13-yr-old football player, 25:667

Conditioned reflexes, quadriceps conditioning and soleus motoneuron excitability, influence in young and old adults, 25:245

Contact sports, contraindication to participation, functional cervical spinal stenosis, commentary, 25:316

Coronary artery disease, myocardial infarction, competitive volleyball, 25:901

Coronary heart disease, physical activity, fitness, risk factors, active men and women, 25:572

Cycle ergometry, ventilatory threshold, healthy subjects, 25:1120

Cycling
elite cyclists, maximal and submaximal aerobic variables, monitoring, 25:1062
ergometry equation validation, steady-rate maximal oxygen uptake, prediction, 25:970
fluid restriction, plasma volume and proteins, 25:1225
one- and two-legged, peak oxygen deficit, men and women, 25:584
preferred and economical cadences, association, 25:1269
steady-state, exercise efficiency and maximal oxygen uptake, body mass, 25:1031
time trial performance, effect of pacing strategy, 25:383
upright and aero-posture, exercise ventilatory response, 25:608

D

Dehydration
nutrition and, effects of gradual and rapid weight loss, wrestlers and judo athletes, 25:371
rehydration, rowing ergometry, 25:1358

Detraining, effects on power athletes, 25:929

Deuterium oxide, variability in total body water, college-age males, 25:1422

Diabetes, urinary transferring excretion, changes after moderate exercise, 25:1110

Dialysis, determinants of $\dot{V}O_{2max}$ on and off, end-stage renal disease, 25:18

Diet, iron status, athletes, 25:796

Digestion, exercise, carbohydrate supplements, 25:1211

Disability
chronic, capacities and adaptations of people with, current research, future directions, applicability, 25:421
mental retardation, work productivity and exercise, 25:442

DNA
mitochondrial sequence polymorphism, response to endurance training, 25:766
modulation of IGF mRNA abundance, muscle denervation atrophy, 25:1005

Down syndrome, adolescents, effects of aerobic training, 25:270

Drug metabolism, effect of training and anabolic-androgenic steroids, rat liver, 25:815

Dysfunctional eating, weight control practices, lightweight football players, 25:694

E

Eccentric muscle performance, elbow and knee muscle groups, untrained men and women, 25:936

Elderly, physical activity assessment, survey, 25:628

Electrical stimulation, surface, monkey skeletal muscle, effects on structure and metabolic properties, 25:355

Electroencephalogram, golf putt and,

measure of attentional patterns prior to, 25:116

Electrolytes, carbohydrate beverages, effects on gastric emptying and secretion, 25:42

Endurance, physical activity patterns, elderly women, 25:1152

Endurance athletes
central blood volume and cardiac filling, regulation, Frank-Starling mechanism, 25:727
overtraining, brief review, 25:854

Endurance training
mitochondrial DNA sequence polymorphism, maximal oxygen uptake, 25:766
parturition to marathon, elite runner, 16-wk study, 25:673
walking, claudication pain after, dissipation, 25:904

Energy balance, female endurance runners, 25:1398

Energy expenditure
evaluation, Saint-Etienne Physical Activity Questionnaire, 25:1405
habitual walkers, self-selected exercise intensity, 25:1174
walking and running, Caltrac and indirect calorimetry, 25:1365

Epidemiology
injuries, soccer players, pre- and adolescent, 25:1330
leisure physical activity, children, 25:847
musculoskeletal injuries in physical training, young men in the army, 25:197

Ergometry
equation, cycling, prediction of steady-state maximal oxygen uptake, 25:970
forward vs reverse wheelchair, physiological comparison, 25:1265

Ethics, sports medicine, sport, science, and society, 25:888

Exercise
active and passive dynamic, heart rate transient at onset, 25:37
acute, reverse cholesterol transport, 25:1346
aerobic training, effects on adolescents with Down syndrome, 25:270
aging and, antioxidant enzyme response to, 25:225
ammonium chloride ingestion, effects on muscular strength and endurance, 25:809
antioxidant enzyme activity, training-induced changes, 25:1135
before and after, urinary excretion of immunoglobulins, humans, 25:171
capacities, poliomyelitis and post-polio syndrome, research, directions, applicability, 25:466
carbohydrate ingestion, liquid vs solid, 25:966
carbohydrate supplements, gastrointestinal problems, 25:1211
cardiac disease, shoveling and thermal stress, men, 25:790
cardiopulmonary fitness, HIV-infected persons, 25:684
Children's Activity Rating Scale, young children, 25:1415
classification of energy costs, human physical activity, Compendium of Physical Activities, 25:71

clearance of oxidant stress products and loosely bound iron, influence on, 25:213
 comparison of oxygen consumption at rest and, K2 telemetry system and metabolic cart, 25:396
 cross-country and downhill skiers, ³¹P-NMR evaluations, pulmonary and local, 25:29
 detraining, effects on power athletes, 25:929
 effects of nicotinic acid, respiratory exchange ratio, 25:1018
 elderly, survey, 25:628
 elite cyclists, maximal and submaximal aerobic variables, monitoring, 25:1062
 endurance, T cell activation, 25:1352
 exogenous substrate oxidation, computation using ¹³C-labeling, comparison of two methods, 25:297
 health, aging, and, need for information, 25:538
 heart rate and body motion, simultaneous measurement, physical activity quantitation, 25:109
 heart rate monitoring, reliability and variability of indicators, children, 25:389
 high-intensity training, influence on $\dot{V}_{O_{2max}}$ relationship, 25:275
 high- vs moderate-intensity, natural killer cell activity, 25:1126
 hyperglycemia and, alteration in glucose transport and GLUT4, Zucker rat, 25:341
 hyperplasia, skeletal muscle fiber, 25:1333
 immune function and, elderly women, 25:823
 -induced asthma, 25:554
 -induced oxidative stress, supplementation with antioxidants, role in prevention, 25:232

 stair-climbing vs run training, treadmill and track running performance, 25:1275
 StairMaster, effect of stepping rate, energy costs, 25:378
 stepping, oxygen consumption during, sources of variation, 25:139
 sudden cardiac death, athletes and athletics, 25:981
 testing, physical activity questionnaire, simultaneous evaluation of 10, 25:81
 training in iron deficient rats, altering of feed efficiency and body composition, 25:52
 treadmill running, oxygen cost, rats, 25:1259
 world class male athletes, increased life expectancy, 25:237
Exercise testing, oxygen uptake, children, 25:689
Exercise training
 amenorrhea, young female athletes, low bone mineral density, 25:1197
 anabolic-androgenic steroids, effects on drug metabolism, rat liver, 25:815
 aortic-cardiac reflex, hypotension in aerobically fit young men, 25:1024
 canine cardiac sarcoplasmic reticulum, no alteration, 25:1246
 cardiopulmonary baroreflex, forearm vascular resistance, humans, 25:722
 chronic endurance, inadequate blood pressure regulation, reduced tolerance to LBNP, 25:713
 hemodynamic responses, tolerance to LBNP, 25:705
 orthostatic intolerance, overview, 25:702
Experimental design, mechanostat theory application, 25:1293
Extracellular matrix components, changes of vinculin and, rat skeletal muscle, after blunt trauma, 25:832

F

Fatigue, sodium bicarbonate ingestion, effect on resistance exercise performance, 25:960
Fatty acids, carbohydrate dependence, marathon running, 25:1009
Female athlete, disordered eating, amenorrhea, osteoporosis, 25:775
Fitness, body fat, diet, blood lipid level, and, 10-15-yr-olds, 25:748
Flexibility, physical activity patterns, elderly women, 25:1152

Football, college player, inguinal hernia, case study, 25:318
Football injuries, liver laceration, 13-yr-old, 25:667
Fractures, physical activity, growth velocity, adolescent Belgian boys, 25:801
Free radicals, antioxidant enzyme activity, skeletal muscle, training-induced changes, 25:1135

G

Gait changes, optimal transition speeds, human locomotion, 25:1158
Ganglions, isolated, anterior cruciate ligament, 25:550
Gestation, exercise response, recent advances, review, 25:1305
Glucose
 carbohydrate dependence, marathon running, 25:1009
 nutrition effects on performance, soccer, 25:1370
 uptake after acute exercise, rat, 25:841
Glycogen depletion, submaximal exercise metabolism, effect of L-carnitine, 25:733
Golf, putt, attentional patterns prior to, electroencephalographic measures, 25:116
Granulocytes, plasma hormones, interval exercise, 25:1252
Gross efficiency, maximal oxygen uptake, steady-state cycling, body mass, 25:1031
Growth velocity, fracture, physical activity, adolescent Belgian boys, 25:801
Gymnastics, elite gymnasts, injuries, 25:1322
Gymnasts, body composition analysis, six regression equations, comparison, 25:648

H

Health, exercise, aging, need for information, 25:538
Heart
 cardiac hypertrophy, insulin-like growth factor gene expression, Sprague-Dawley rats, 25:495
 endurance exercise training, canine cardiac sarcoplasmic reticulum, no alteration, 25:1246
 left ventricular mass, determination by magnetic resonance imaging, junior Olympic weightlifters, 25:522
 rate and body motion, simultaneous measurement, physical activity quantitation, 25:109
 rate monitoring in children, reliability and variability of indicators, 25:389
 rate transient, onset of active and passive dynamic exercise, 25:37
 stepping rate effects, energy costs, StairMaster exercise, 25:378
Heart rate
 maximal oxygen uptake, running performance, run vs cycle/run training, 25:1393
 submaximal jogging treadmill test, college-aged persons, development, 25:643
Heart structure, cardiovascular fitness, anabolic steroids, 25:1240
Heart transplantation, lactate and ventilatory thresholds, relationship in clinical exercise, 25:191
Heat transfer, clothing-specific coefficients, simultaneous derivation, 25:283

Hemodynamic responses, tolerance to LBNP, exercise training, 25:705

Hernia, inguinal, college football player, case study, 25:318

HIV

exercise, cardiopulmonary fitness, 25:684
policies and universal precautions, NCAA institution survey, 25:917

Home field advantage, time zone and game time changes, effect on team performance, National Football League, 25:127

Hormones, detraining, effects on power athletes, 25:929

Hyperglycemia, exercise training and, alteration in glucose transport and GLUT4, Zucker rat, 25:341

Hyperhydration, symptomatic hyponatremia, prolonged exercise, heat, 25:543

Hypertrophy, skeletal muscle fiber hyperplasia, 25:1333

Hypobaric hypoxia, perceived exertion, low- and moderate-altitude natives, 25:945

Hyponatremia, prolonged exercise, in heat, 25:543

Hypotension, diminished aortic-cardiac reflex, aerobically fit young men, 25:1024

I

Ibuprofen, muscle soreness, damage and performance, investigation, 25:9

IGF, modulation of mRNA abundance, muscle denervation atrophy, 25:1005

Immersion, prone, asthma, bronchial responsiveness, children, 25:1098

Immune system, natural killer cell activity, high- vs moderate-intensity exercise, 25:1126

Immunoglobulins, urinary excretion, before and after exercise, humans, 25:171

Indirect calorimetry, Caltrac, energy expenditure estimation, walking and running, 25:1365

Injuries

elite gymnasts, over 10 yr old, 25:1322
musculoskeletal, associated with physical training, young men in the army, 25:197
recreational, surveillance, capture-recapture approach, 25:204
restriction response, acute muscle strain, 25:321

soccer players, pre- and adolescent players, 25:1330

Insulin-like growth factor, gene expression, modulation during cardiac hypertrophy, 25:495

Interval exercise

iron status, trained men, 25:778
leukocyte subsets, plasma hormones, responses, 25:1252

Iron

diet and, athletes, 25:796
loosely bound, oxidant stress products and, influence of exercise on clearance, 25:213

Iron deficiency, effects on maximal oxygen uptake, endurance, blood lactate, women, 25:1386

Iron supplementation, and discontinuation, serum copper, zinc, calcium, magnesium levels, 25:562

Ischemic heart disease, shoveling and

thermal stress, physiologic responses, men, 25:790

Isokinetic test, knee extension, moment-angle curves in, evaluation, 25:251

Isometric strength, mediopatellar synovial plica of the knee, arthroscopic treatment, 25:985

J

Jogging

submaximal 1-mile track jog, $\dot{V}O_{2max}$ estimation, fit college-age humans, 25:401
submaximal treadmill test, college-aged persons, development, 25:643

K

Knee

and elbow muscle groups, eccentric muscle performance, untrained men and women, 25:936

isokinetic extension, moment-angle curves in, evaluation, 25:251

K2 telemetry system, metabolic cart and, comparison of oxygen consumption, ventilation rates and respiratory rates measurements, 25:396

L

Lactate, plasma accumulation, distance running performance, 25:1091

Lactate production, catabolism, equilibrium, during exercise, 25:620

L-carnitine, submaximal exercise metabolism, muscle glycogen depletion, 25:733

Leisure physical activity, epidemiology, adolescents, 25:847

Leukocyte common antigen, activation, after endurance exercise, 25:1352

Lipid Research Clinics, physical activity questionnaire, self-reported status, validity and reliability, 25:92

Lipoproteins, reverse cholesterol transport, acute exercise, 25:1346

Liver laceration, unusual presentation, 13-yr-old football player, 25:667

Lower body negative pressure

reduced tolerance, inadequate blood pressure regulation, chronic endurance exercise training, 25:713
tolerance, hemodynamic responses, exercise training, 25:705

Lymphocytes

activity, high- vs moderate-intensity exercise, 25:1126
plasma hormones, interval exercise, 25:1252

M

Magnetic resonance imaging

determination of left ventricular mass, junior Olympic weightlifters, 25:522

³¹P-MRS of quadriceps, differences between sprinters and long-distance runners, 25:479

Maximal exercise, coronary heart disease, risk factors, active men and women, 25:572

Maximal oxygen uptake

distance running performance, plasma lactate accumulation, 25:1091
exercise efficiency, steady-state cycling, body mass, 25:1031
physiological response, simulated competition, 25:877

predicting steady rate, cycle ergometry equation, validation, 25:970

running performance, run vs cycle/run training, 25:1393

Maximum heart rate, relationship with maximal oxygen uptake, exercise prescription in obesity, 25:1077

Mechanical load, bone mineral density, children, 25:1203

Mechanical output, mono- and biarticular muscles, function, running, 25:1163

Mechanostat theory, application, research design, 25:1293

Mental retardation, exercise fitness, obesity, work productivity, 25:442

Metabolic rate, two seasons of weight cycling, college wrestlers, 25:613

Metabolism

exercise, cardiac output, maternal aerobic fitness, 25:993

human locomotion, optimal gait transition speeds, 25:1158

muscular strength and endurance, effects of exercise, ammonium chloride ingestion, 25:809

treadmill running, oxygen cost, rats, 25:1259

Mood, weight lifting, state anxiety and ambulatory blood pressure following, females, 25:516

Mortality, increased life expectancy, world class male athletes, 25:237

Multiple sclerosis, exercise and, physiologic responses during, 25:451

Muscle

acute strain, restriction of injury response, 25:321

fatigue

ergometry, 25:412
inspiration, leg muscle force, recovery pattern,

fiber type distribution in vastus lateralis, estimation by Cybex testing and biopsy, 25:363

monkey skeletal, surface electrostimulation, effects on structure and metabolic properties, 25:355

murine skeletal, continuous infusion of anabolic steroid, effect, 25:485

skeletal

glycogen resynthesis, after resistive exercise, 25:349

K⁺-induced respiration in, effects of Ca²⁺-channel drugs, 25:473

soreness, damage, and performance, ibuprofen and, investigation, 25:9

Muscle bioenergetics, study during exercise, phosphorus nuclear magnetic resonance, 25:656

Muscle endurance, fatigability of human quadriceps femoris, after anterior cruciate ligament reconstruction, 25:783

Myocardial infarction, competitive volleyball, case report, 25:901

N

National Football League, time zone and game time changes and, effect on team performance, 25:127

Natural killer cells, pulmonary tumor metastases, natural cytotoxicity, effect of exercise, mice, 25:922

Near infrared analysis, body composition, children and adolescents, 25:1185

Nicotinic acid, effects on respiratory exchange ratio, substrate levels during exercise, 25:1018

Nonsteroidal anti-inflammatory, ibuprofen, muscle soreness, damage, and performance, investigation, 25:9
NSAIDs, human fibroblasts, effects of repetitive motion, 25:603

Nuclear magnetic resonance, phosphorus, muscle bioenergetics, study during exercise, 25:656

Nutrition

altering of feed efficiency and body composition, exercise training, iron deficient rats, 25:52

performance and, effects of gradual and rapid weight loss, wrestlers and judo athletes, 25:371

performance effects, soccer, 25:1370

status of ultramarathoners, dietary intakes and biochemical profiles, 25:328

O

Obesity, exercise prescription, heart rate and maximal oxygen uptake, relationship, 25:1077

Orthostatic intolerance, exercise training, overview, 25:702

Orthostatic tolerance, central blood volume and cardiac filling, Frank-Starling mechanism, endurance athletes, 25:727

Os calcis, osteoid osteoma, teenage athlete, 25:2

Osteoma, osteoid, os calcis, teenage athlete, 25:2

Osteoporosis, disordered eating and amenorrhea, female athlete, 25:775

Overtraining

elite swimmers, hormonal responses, 25:741

endurance athletes, brief review, 25:854

hormonal responses, elite swimmers, 25:741

Oxidant stress

clearance of products and loosely bound iron, influence of exercise, 25:213

exercise, aging and, 25:210

prevention of exercise-induced, role of antioxidants, 25:232

Oxidation, computing exogenous substrate, two methods using ^{13}C -labeling, comparison, 25:297

Oxidative enzymes, skeletal muscle antioxidant enzyme activity, training-induced changes, 25:1135

Oxygen consumption

cardiac output and, relationship in work of breathing, 25:335

cross-country and downhill skiers, pulmonary and local ^{31}P NMR evaluations, 25:29

heart rate and body motion, simultaneous measurement, physical activity quantitation, 25:109

K2 telemetry system and metabolic cart, comparison of measurement, 25:396

maximal and submaximal aerobic variables, elite cyclists, monitoring, 25:1062

sources of variation during stepping task, 25:139

Oxygen deficit, one- and two-legged cycling, men and women, 25:584

Oxygen uptake

cycling, time trial performance, pacing strategy and, 25:383

estimation, submaximal 1-mile track jog, fit college-age humans, 25:401

exercise testing, children, 25:689

graded downhill walking, metabolic response, 25:159

heart rate and, spinal cord injury, 25:1115

inadequate blood pressure regulation, LBNP, reduced tolerance, 25:713

K^+ -induced respiration, effects of Ca^{2+} -channel drugs on, skeletal muscle, 25:473

quadruplegia, ergometric testing, 25:432

wearing of respiratory apparatus and, effect on running style and economy, 25:260

P

Paraplegia

cardiovascular responses, prolonged arm exercise, thermal stress, 25:577

exercise capacity, cardiorespiratory fitness, 25:423

heart rate, oxygen uptake, 25:1115

upper body training, electrical stimulation, effects, 25:1054

Patella rotation, patella taping, effect on perceived pain, 25:989

Peak aerobic power, estimation, shallow water running test, 25:1287

Perceived exertion, hypobaric hypoxia, low- and moderate-altitude natives, 25:945

Performance enhancement, optimal training load, 25:1279

Physical activity

CARDIA study, cigarette smoking and submaximal exercise test, biracial young adults, 25:911

classification of energy costs, Compendium of Physical Activities, 25:71

coronary heart disease, active men and women, 25:572

leisure time, seasonal variation, 25:755

self-reported, validity and reliability, Lipid Research Clinics questionnaire, 25:92

survey, free-living populations, health effects, 25:60

Physical Activity Recall, seven-day, self-reporting, children and adolescents, 25:99

Physical development, anthropometric growth patterns, high school wrestlers, 25:1141

Physical performance, iron deficiency, women, 25:1386

Plasma, volume and proteins, fluid restriction, cycling, 25:1225

^{31}P NMR spectroscopy, pulmonary and local, cross-country and downhill skiers, 25:29

Poliomyelitis, post-polio syndrome and, exercise capacities and adaptation, research, directions, applicability, 25:466

Postpartum exercise, marathon, elite runner, 16-wk study, 25:673

Post-polio syndrome, exercise capacities and, research, directions, applicability, 25:466

Power development, optimal training load, 25:1279

Pregnancy, maternal aerobic fitness, cardiac output, exercise, 25:993

Prostaglandins, human fibroblasts, effects of repetitive motion, 25:603

Puberty, bone mineral density, mechanical loading regime, children, 25:1203

Pulmonary function, exercise response, upright and aero-posture cycling, 25:608

Q

Quadriceps, influence of conditioning on soleus motoneuron excitability, young and old adults, 25:245

Quadruplegia, exercise responses and, ergometric testing, 25:432

Questionnaire

Lipid Research Clinics, self-reported physical activity status, validity and reliability, 25:92

physical activity

free-living populations, health effects, 25:60

simultaneous evaluation of 10 commonly used, 25:81

R

Range of motion, preload, isokinetic torque, women, 25:1038

Recreational sports, serious injuries and, surveillance by capture-recapture approach, 25:204

Regeneration, rat skeletal muscle, after blunt trauma, changes of vinculin, 25:832

Regression equations, comparison, body composition analysis, 25:648

Rehabilitation, mediopatellar synovial plica of the knee, arthroscopic treatment, athletes, 25:985

Renal disease, end-stage, determination of $\text{VO}_{2\text{max}}$ in patients, on and off dialysis, 25:18

Resistance exercise, parameter response, fibrinolytic and hemostatic, 25:597

Resistance training, dry-land, competitive swimming, 25:952

Reverse cholesterol transport, acute exercise, 25:1346

Reverse propulsion, forward vs reverse wheelchair, physiological comparison, 25:1265

Rowing, ergometry, after dehydration and rehydration, 25:1358

Running

distance performance, plasma lactate accumulation, 25:1091

economy and style, effect of wearing respiratory apparatus, 25:260

economy of walking and, interrelationships between mechanical power, energy transfers and, 25:508

effects of nicotinic acid, respiratory exchange ratio, exercise, 25:1018

female endurance runners, energy balance, 25:1398

female runner, false negative bone scan, 25:179

from parturition to marathon, 16-wk study, 25:673

marathon

carbohydrate dependence, 25:1009

inspiration, leg muscle force, and recovery pattern, alterations after, 25:501

peripheral blood lymphocyte subsets, changes in, 25:186

prolonged treadmill exercise in heat, thermal effects, 25:310

mono- and biarticular muscles, function, 25:1163

shallow water test, peak aerobic power estimation, 25:1287
 sprinters and long-distance runners, ^{31}P -MRS of quadriceps reveals differences, 25:479
 stair climbing, treadmill and track running performance, effect, 25:1275
 ultramarathoners, nutritional status, dietary intakes and biochemical profiles, 25:328
 walking and, energy expenditure estimation, Caltrac and indirect calorimetry, 25:1365
Running performance, maximal oxygen uptake, run vs cycle/run training, 25:1393

S

Saint-Etienne Physical Activity Questionnaire (QAPSE), energy expenditure evaluation, development, validation, 25:1405
Salivary immunoglobulins, decrease, intense interval exercise, 25:678
Serum iron, intense interval exercise, trained men, 25:778
Skeletal muscle, hypertrophied, skinned fibers, contractile properties, 25:999
Skating, cross-country and downhill skiers, ^{31}P NMR evaluations, pulmonary and local, 25:29
Skin blood volume, temperature, bioelectric impedance, exercise, 25:1231
Skinned fibers, hypertrophied skeletal muscle, contractile fibers, 25:999
Slaughter skinfold equations, cross-validation, children and adolescents, 25:1070
Soccer
 injuries, pre- and adolescent players, 25:1330
 nutrition, performance effects, 25:1370
Social anxiety, Social Physique Anxiety Scale, construct validity, adolescent females, 25:1049
Social Physique Anxiety Scale, construct validity, adolescent females, 25:1049
Sodium bicarbonate, ingestion, effect on resistance exercise performance, 25:960
Spinal cord injury
 heart rate, oxygen uptake, 25:1115
 isometric strength, sprint and aerobic power, 25:863
 upper body training, electrical stimulation, effects, 25:1054
Sports, fractures, growth velocity, adolescent Belgian boys, 25:801
Sports medicine
 ethics, sport, science, and society, 25:888
 HIV/AIDS policies and universal precautions, NCAA institution survey, 25:917

Steroids, anabolic-androgenic, training, effect on drug metabolism, 25:815
Strength
 elite junior Olympic weightlifters, bone mineral density, 25:1103
 maximal and submaximal, effect of training on relationship, 25:132
 short-course triathlon performance, physiological predictors, 25:871
Submaximal exercise, metabolism, effect of L-carnitine, muscle glycogen depletion, 25:733
Submaximal treadmill test, jogging, college-aged persons, development, 25:643
Sudden cardiac death, athletes and athletics, 25:981
Swimming
 competitive, dry-land resistance training, 25:952
 elite swimmers, overtraining, hormonal responses, 25:741
 prone immersion, asthma, bronchial responsiveness, children, 25:1098
Syncope, exercise-induced, athletes and, tilt table testing in evaluation, 25:24

T

T cells, exercise, elderly women, 25:823
Temperature, shoveling, cardiac disease, physiologic responses in men, 25:790
Tendonitis, repetitive motion, effects on human fibroblasts, 25:603
Testosterone, weightlifting, effects of differing intensities, 25:1381
Tilt table testing, recurrent exercise-induced syncope and, athletes, 25:24
Torque, isokinetic, effect of preload and range of motion, women, 25:1038
Training, effect on relationship of maximal and submaximal strength, 25:132
Transient, heart rate, onset of active and passive dynamic exercise, 25:37
Treadmill, prolonged exercise in heat, thermal effects, 25:310
Triathlon, short-course performance, physiological predictors, 25:871

U

Ulnar bending stiffness, recreational activity, muscle strength, men, 25:592

V

Variable resistance, maximal and submaximal strength, effect of training on relationship of, 25:132
Ventilation, exercise response, upright and aero-posture cycling, 25:608
Ventilatory threshold, inspiratory muscle performance, healthy subjects, 25:1120
Vision, loss and performance, blind athletes, 25:265
Volleyball, myocardial infarction, case report, 25:901

W

Walking
 claudication pain dissipation after, endurance training implications, 25:904
 economy of running and, interrelationships between mechanical power, energy transfers and, 25:508
 exercise intensity, self-selected, 25:1174
 graded downhill, metabolic response, 25:159
 running and, energy expenditure estimation, Caltrac and indirect calorimetry, 25:1365
Water exercise, shallow water running test, peak aerobic power estimation, 25:1287
Weight, control practices, lightweight football players, 25:694
Weight cycling, two seasons, lower resting metabolic rate, college wrestlers, 25:613
Weightlifting
 differing intensities, effects on serum testosterone, 25:1381
 elite junior Olympic, bone mineral density, 25:1103
 junior Olympic weightlifters, determination of left ventricular mass, magnetic resonance imaging, 25:522
 state anxiety and ambulatory blood pressure following, females, 25:516
Weight loss
 gradual and rapid, effects on nutrition and performance, wrestlers and judo athletes, 25:371
 metabolic rate, two seasons of weight cycling, college wrestlers, 25:613
Weight training
 anabolic steroids, heart structure, cardiovascular fitness, 25:1240
 leg ergometry, 30-min, state anxiety and blood pressure, 25:1044
Wheelchair, forward vs reverse, physiological comparison, 25:1265
Wheelchair propulsion, isometric strength, sprint and aerobic power, 25:863
Wingate test, benzodiazepine and caffeine interaction, effects, 25:1375
Wolfe memorial lecture, ethics in sports medicine, 25:888
Women, iron supplementation and discontinuation, serum copper, zinc, calcium, magnesium levels, 25:562
Wrestling
 high school
 anthropometric growth patterns, 25:1141
 prediction of minimal weight, comparison of methods, 25:151
 \dot{W}_{max} - $\dot{V}_{\text{O}_{2\text{max}}}$ relationship, influence of high-intensity exercise training on, 25:275

X

X-ray absorptiometry, skinfolds, hydrostatic weighing and, prediction of body, adult males, 25:528
